Introduction

My ideal workplace is an environment of innovation, a strong team practicing Agile methodologies, and a culture of excellence and trust. I bring over 15 years of industry experience, an appetite for innovation, and a broad understanding of the technological landscape. I am motivated to create, and I am not satisfied with the status quo.

Languages and Technologies

Experience with Java, Scala, Typescript, Akka, Python, C#, SQL

Limited experience with ReactJS, AngularJS, C++, Lisp, HTML, CSS

Technologies

AWS, Serverless, Microservices, DDD, Kafka, Spring, Spring Boot, Lucene, Solr, Cassandra, Agile, Scrum, SVN, Git, JSON, MySQL, PostgreSQL, MSSQL, Oracle, MongoDB, SQLite, DynamoDB, D3, .Net

Industry Experience

Senior Software Architect, Phase 2, 11/2022 – Present

- Lead a team of engineers to modernize and replace several aging systems for the Oklahoma Employment Security Commission.
- Develop and deliver systems to enable and empower job seekers and employers in the state of Oklahoma.

Senior Software Engineer, Heartland, 04/2021 – 11/2022

- Work with a team of engineers to design and build a new ecommerce application to extend the existing retail point of sale offering.
- Implement and deliver core ecommerce functionality to support internal and external consumers of our products and apis.
- Provide insight and recommendations to ensure the delivery of scalable, reliable, and performant software.

Remote Senior Software Engineer, Lifeway, 05/2019 – 04/2021

- Work with a remote team of engineers focused on building out technical solutions to support various business objectives for Lifeway.com.
- Implement a new serverless event bridging application to facilitate event sourced application architectures across the enterprise.
- Design and implement various application CodePipelines for improved CI-CD across the organization.
- Implement application features for a LTI (Learning Tools Interoperability) application for Liberty University.

Team Lead, Sonic Drive-In, 03/2018 – 04/2019

- Provide oversight and guidance across multiple teams (full time staff and remote vendor partners) of engineers on multiple projects.
- Lead a team of engineers focused on building out a microservices platform supporting business objectives (e.g., mobile order ahead and tipping) for web and mobile channels.
- Lead a team of engineers focused on the construction of a custom, customer support web application to enable support personnel to offer best in class customer service to customers.
- Responsible for bringing scalability, reliability, and performance to various technical platforms.

Technical Team Lead, Hobby Lobby, 9/2017 – 03/2018

- Provide oversight and guidance for the application architecture of www.hobbylobby.com.
- Research and develop a methodology for moving components of www.hobbylobby.com away from a monolithic architecture towards microservices deployed on the Amazon Web Services (AWS) infrastructure.
- Investigate the integration of machine learning into the ecommerce shopping experience for personalization and product recommendations.
- Continue to design and implement various features and functionality on the large-scale Hybris eCommerce platform for www.hobbylobby.com.
- Provide mentorship for more junior software developers.
- Continue to provide troubleshooting and performance tuning for www.hobbylobby.com.

Senior Software Engineer, Hobby Lobby, 11/2014 – 03/2018

- Design and implement various features and functionality on the large-scale Hybris eCommerce platform for www.hobbylobby.com. Main technologies include Java, Solr, Spring, and MySQL all deployed on the Amazon Web Services architecture.
- Specifically tasked with troubleshooting and tuning performance and stability aspects of the application, especially those related to garbage collection.
- Responsible for overhauling product search and relevance for www.hobbylobby.com using Apache Solr.

Technical Lead, Software Engineer, MSCI, 03/2013 - 03/2014

- Led a team of 4 Software and Environment Engineers responsible for designing and implementing platform enhancements, focusing primarily on stability and performance of the distributed SOA application platform.
- Helped to define and propose a new platform enhancement project that will add throttling to the current application architecture, therefore increasing the overall stability and recoverability of the platform.
- Designed and architected a Java/Oracle software application to perform load and stress testing of the distributed SOA platform by replicating production load - consisting of millions of operations per day.
- Designed and implemented an EXTJS web application to interface with application for replicating production load.
- Responsible for maintaining development environments for ~50 developers, spread across the world in multiple locations.

Software Engineer, United States Air Force, 07/2011 - 03/2013

- Designed, implemented, and maintained various application components and APIs within a .Net application. Application built using MVVM and WPF.
- Responsible for the holistic data layer of the application, including data persistence and retrieval. Entity Framework and MSSQL.
- Updated and maintained the charting and reporting capabilities within the application using Infragistics and WPF visualization and reporting controls.

Software Engineer, RiskMetrics Group, 05/2007 - 07/2011

- Implemented business requirements to add new features to a large-scale, distributed Java Struts web application.
- Worked as part of a team responsible for building an updated data storage service within the larger SOA platform architecture. Used Lucene for data indexing and Cassandra/Oracle for persistence.
- Designed and implemented various dev-ops tools to interact with a large, distributed SOA platform. (Java, Python)
- Upgraded and maintained in-house, python build and deployment systems.

Software Engineer in Test (Intern), 05/2005 - 05/2007

- Designed and executed manual and automated test plans for a distributed web application.
- Maintained an extensive automated regression testing framework built using Perl and SilkTest.

Education

Master of Science in Computer Science, 05/2010
University of Oklahoma, Norman, OK

4.0 GPA

Bachelor of Science in Computer Science, 05/2007
University of Oklahoma, Norman, OK
3.98 GPA
